

Heat Protection Tube

## FITCO®Therm-B

FITCO®Therm-B is a braided sleeve, constructed with electrical grade fiberglass filaments. A special thermal treatment ensures that it is purified from chemical contaminants. It is also available in an impregnated version.

FITCO®Therm-B is engineered for low voltage applications where temperatures up to 650°C may be encountered. It is flexible, expandable and resistant to fraying and thus readily slipped over irregular shapes or tight turns.

FITCO®Therm-B provides a sturdy, durable and cost-effective insulation solution.

**Operating temperature:** -60°C to +650°C

**Standard color:** Black, Orange

### Key Benefits:

- Outstanding heat insulation
- Cold cut
- Flammability grade: UL1441 / self-extinguishing VW-1
- Flexible, expandable, fray-resistant
